Certifications

- ❖ **Front End Domination** - Sheriyans Coding School
- ❖ **Mendix Advanced Developer** - Mendix Academy
- ❖ **AI Prompt Engineering** - Coursera

Education

B.Tech – Computer Science Engineering

Christ College of Engineering and Technology – 70% (2016 – 2020)

Work

Title	: Dubai Municipality - Naqil
Technologies	: HTML, SCSS, Bootstrap, Mendix, Javascript, JQuery, Figma
Roles	: Both Mendix & UI/UX Developer
Responsibilities	: Integrated Dubai Economical Department service to validate the registered company details in the application and converting wireframes into Responsive HTML, Mendix Templates and debugging & troubleshooting the existing code
Description	: This project deals with building a sewage plant treatment (STP) maintenance application. Through this application, any company can register under Dubai Municipality STP for disposing of sewage. Each company can register multiple vehicles for disposing of waste. While entering the STP, every vehicle tagged with RFID Tag (used to link the vehicle to a company), will pass through an online analyzer to check the hazardness of the sewage, classify the vehicle as green or red based on the pH value and allowed it to enter specific gates. If the pH value is high then the company and vehicle will be fined. Every disposal company needs to pay some amount to Dubai Government and they can recharge and maintain their balance via the application.

Title	: AMAF - Smart Services and Websites
Technologies	: HTML, SCSS, Bootstrap, Mendix, Javascript, JQuery
Roles	: UI/UX Developer
Responsibilities	: To create the responsive User Interface for an application & mentor junior team members in their development activities
Description	: AMAF is all about donation portal and services like minor peoples donation, tenant services and Ish'had Request(this service allows citizens to apply for an Ish'had certificate issued by AMAF Judge to attest endowment of their private property).

Title	: UM6P - University of Morocco
Technologies	: HTML, SCSS, Bootstrap, Mendix, Javascript, JQuery
Roles	: UI Developer
Responsibilities	: Converting wireframes into Responsive HTML, Mendix Templates, Mendix Workflow and also Debugging and troubleshooting the existing code
Description	: This website is based on the university of morocco & it is all about the maker-checker process for internal employees and faculties. We create this website for digitalizing the process of their document work.

Achievement

UI Excellence Award – RDFEST (2023 & 2024, 2 consecutive years) at Rapiddata
